

USING CHAPTER MASTER ON AN INDIVIDUAL FILE

First, we need to locate an AAC file (an audio file with extension .m4a or .m4b) to add chapters to.

If the file has already been imported into iTunes, we'll need to remove it so we can work on it.

If the file has NOT already been imported into iTunes, you can open it immediately in Chapter Master.

Here's a file we've worked on in Chapter Master.

In this file, I've taken the trouble to position the chapter stops at the 'real' book chapters. This can take a bit of trial and error, using the audio play controls, but can be well worth it for a well-loved work you'll listen to several times.

Once we've saved it, we can import it into iTunes.
